1.1 GHIDINI GROUP

Dal 1929, Ghidini Pietro Bosco rappresenta una lunga storia di maniglie e coordinati. Lo sviluppo dell'azienda si inserisce nella operosa tradizione artigianale ed industriale, che caratterizza la Val Trompia. Il soprannome "Bosco" indicava la località nei pressi della cascina di proprietà della famiglia Ghidini e fu attribuito alla famiglia per distinguerla dai numerosi ceppi omonimi della zona. Nel 1950 l'ingresso in azienda dei figli porta, dapprima alla creazione dei nuovi stabilimenti e poi al costante processo di innovazione tecnologica. Attualmente, una serie di più recenti acquisizioni impone l'organizzazione di una più vasta realtà produttiva riunita sotto il marchio GHIDINI GROUP. Nel nuovo gruppo imprenditoriale sono quindi oggi compresi: GHIDINI, il marchio storico, GHIDINI ALUMINIUM, un nuovo marchio specializzato nella realizzazione di maniglie d'alluminio. GM, per la produzione di maniglie e coordinati destinati al contract ed alle grandi forniture per le industrie del settore del serramento. DE VENIERI, una produzione creata con maestri artigiani locali, per rieditare forme e materiali delle antiche maniglie della tradizione. Il nuovo assetto di Ghidini Group risulta quindi essere un sicuro riferimento per il settore riunendo in un solo produttore il più vasto catalogo di soluzioni tecniche e formali per maniglie e coordinati in ottone, bronzo, acciaio inox, lega di zinco, alluminio, nylon e ferro.

A company which makes handles and coordinates, with a long history dating back to 1929. The history of our company results from this industrious and artisan tradition of both skilled labour and agriculture. Ghidini is one of the most typical names in the valley so Pietro took his nickname, for which he has become well-known, from his small farm at Bosco where he also worked. In 1950 the sons entered the company which first of all led to the creation of new factories and also started a constant process of technological innovation. Today a series of more recent acquisitions has made it necessary to organise a much larger manufacturing reality reunited under the Ghidini Group trademark. Today the new business group therefore includes: GHIDINI, the historic brand, GHIDINI ALUMINIUM, a new brand specialised in making aluminium handles. GM, which manufactures handles and coordinates for contracts and large supplies for industries in the window and door frames sector. DE VENIERI, a product created by local craftsmen, to re-edit forms and materials of the ancient tradition of the handles. The new Ghidini Group structure is a sure reference for the sector by bringing together in a single manufacturer in a unique catalog of technical and formal solutions for handles and co-ordinates in brass, bronze, stainless steel, zinc alloy, aluminum, nylon and iron.

Una lunga tradizione di ricerca e realizzazione, tipica delle produzioni protoindustriali d'inizio secolo, accompagna sin dalla fondazione la storia della Ghidini Pietro Bosco. Il primo fondatore era un valente artigiano capace di elaborare nuove forme e un attento ricercatore di innovative soluzioni tecnologiche e costruttive. Dal 1929 via via Ghidini ha sviluppato costantemente questa propria peculiarità strutturando al proprio interno un permanente laboratorio di ricerca: Ufficio Esperienze Ghidini, dedicato allo sviluppo di nuovi prodotti ed alla definizione delle più appropriate tecnologie di produzione. Dagli anni Ottanta poi l'attenzione all'attività di progetto si è propriamente evoluta mediante il costante rapporto con qualificati designer esterni che hanno permesso all'azienda il confronto con nuovi stimoli di ricerca. La presenza di Ghidini nel dibattito che coinvolge il design del prodotto è ormai largamente affermata come ci dimostrano alcune iniziative che sono di sicuro riferimento nel settore: Il periodico "Manua" rivolto ai progettisti ed agli operatori del settore; Il concorso internazionale di design "la maniglia per il III Millennio" voluto per celebrare i 70 anni dell'azienda, dal quale nasce "Infinita" maniglia che risolve in un unico oggetto il rapporto tra placca e leva di manovra. Il progetto "Leonardo" (vincitore del premio Vele d'Oro 2004, e marchio di qualità DfA) è la più significativa innovazione nel settore delle maniglie e risolve in una forma nuova i temi del "design for all".

A long tradition of research and manufacture, typical of the proto-industrial manufacture of the start of the last century, has accompanied the history of Ghidini Pietro Bosco right from its foundation. The first founder was a skilled craftsman capable of creating new shapes who carefully researched innovations in technology and construction. Since 1929 Ghidini has gradually and constantly developed this characteristic creating a permanent research laboratory within the company: the Ghidini Experimental Office, dedicated to the development of new products and the definition of the most appropriate manufacturing techniques. Since the eighties attention to design has developed by working constantly together with qualified external designers who have enabled the company to confront new incentives for research. Ghidini's presence in the debate involving product design is now widely recognised as is shown by some initiatives which are a point of reference in this fields: The magazine "Manua", produced for designers and workers in this field; The international design competition "The handle for the III Millennium", created to celebrate the company's seventy year anniversary, from which comes "Infinita" a handle which incorporates the plate and lever in just one object. The "Leonardo" project (winner of "Vele d'Oro" prize and DfA quality marks) is the most significant innovation in the handles sector with its new shape it answers to the theme "design for all".

PROGETTO LEONARDO

Il Progetto Leonardo rinnova il rapporto con l'oggetto maniglia indirizzandolo verso un uso ampliato realmente utilizzabile da bambini, adulti, anziani o persone con sedia a ruote. Un disegno semplice e "voluminoso" determina con eleganza le forme della maniglia e consente l'impugnarla a diverse altezze. Una forma innovativa e gradevole risolve i temi dell'accessibilità e della praticità d'uso senza barriere formali o psicologiche.

Design for all = utenza universale

Il mondo della progettazione si è sempre rivolto ad un modello ideale di utente (ipotizzato già negli studi dell'uomo vitruviano di Leonardo e sino in tempi più recenti dal Modulor di Le Corbusier): un uomo di età media, di buona costituzione fisica che non ammette varianti. Il mondo reale invece è abitato da bambini, giovani, adulti ed anziani, pertanto anche senza tener conto di disabilità gravi l'utente reale non è in grado di usufruire a pienamente ed in modo autonomo le strutture ed i prodotti che la società gli offre. L'uomo di Leonardo non è superato ma deve essere integrato seguendo l'evoluzione di una società che è più attenta alle esigenze di un design for all e cioè universale (per tutti gli utenti). Il progetto deve quindi rivolgersi verso un'utenza più ampia per soddisfare senza

barriere fisiche o psicologiche le diverse esigenze abitative di una società reale. La normativa vigente in tema di accessibilità prevede che le maniglie delle porte, solitamente applicate dalla produzione di serie a 105 cm, sia collocata ad altezza 90 cm. Con la maniglia Leonardo si ha la possibilità di impugnare la maniglia a diverse altezze.

DfA Italia (Design for All Italia, membro di EIDD - Design for All Europe) ha assegnato alla maniglia Leonardo il prestigioso marchio di qualità DfA.

The Leonardo Project takes a new look at our relationship with the handle as an object aimed at a wide range of uses. It really can be used by children, adults, old people and people in wheelchairs. A simple, voluminous design determines the elegant shape of the handle and makes it possible to grip it at different heights. An innovative and pleasing shape answers the need for accessibility and ease of use without formal or psychological barriers.

Dfa Italy (Design for All Italy, member of EIDD - Design for all Europe) has assigned to Leonardo handle the prestigious DFA quality marks for its ability to be used by the largest category of users without placing functional or psychological barriers.

PROGETTO DE VENIERI

Ripercorrendo le antiche tecniche produttive delle botteghe artigiane e dei forni fusori, tradizionalmente operanti sulle sponde del fiume Mella, De Venieri ha compiuto una scelta culturale tanto coraggiosa quanto interessante: ricreare esattamente le forme e l'impatto estetico degli antichi manufatti in bronzo ed in ottone, adoperando materiali, tecniche e processi di finitura coerenti con i valori del progetto. Ecco perchè i manufatti non vengono neppure sottoposti a trattamenti di superficie moderni, lasciando bensì, che progressivamente il metallo acquisisca una sua identità attraverso la "patina del tempo"; qualcosa di unico e inconfondibile, per arredare case altrettanto personali ed esclusive.

Each piece in the De Venieri line is scrupulously researched from historical sources in order to re-create both the form and aesthetic impact of true artefacts.

Once the design is perfect, it is modelled by hand following age old foundry and workshop techniques before being finely rendered in either red or white bronze and finished in one of the variety of applied treatments. From that point onward, these "living object" begin to acquire their own individual identity, responding naturally to the various effects of use and environment and gradually taking on the "Patina of Time".

Likewise, custom-designed articles can be realized with the utmost care and attention to detail befitting the most demanding clientele.

1.2 MATERIALI, FINITURE, AVVERTENZE

MATERIALS, FINISHES, WARNINGS

Ghidini Group può sicuramente vantare il più ampio catalogo di soluzioni, materiali e finiture presenti sul mercato delle maniglie e dei suoi coordinati.

OTTONE

L'ottone é una lega industriale di rame-zinco, nella quale il tenore di zinco é almeno del 50%. I primi utilizzi del rame e delle sue leghe risalgono a 5000 anni fa. Nel nostro caso la lega rappresenta una parte consistente della produzione e nei nostri stabilimenti viene trasformata dallo stato grezzo a semilavorati mediante processi di pressofusione, stampaggio a caldo, tranciatura e imbutitura, tornitura a seconda che si parta da lingotti, spezzoni di barra estrusa, lamiera, barra trafilata.

ZALOR

Zalor é un marchio registrato con cui indichiamo la speciale lega di zinco, alluminio e magnesio particolarmente adatta per pressofusione con cui produciamo articoli che, dopo operazioni di finitura superficiale, vengono sottoposti a trattamenti galvanici di doratura, nichelatura, rodiatura, cromatura nonché all'esclusivo trattamento GHI.CO.TEC.

ALLUMINIO

L'alluminio é sicuramente uno dei metalli non ferrosi più interessanti grazie al suo basso peso specifico ed alla sua buona resistenza alla corrosione che viene notevolmente incrementata mediante ossidazione anodica ed ora anche con l'innovativo trattamento GHI.CO.TEC

NYLON

Nylon é la denominazione commerciale della poliammide 6.6, resina termoplastica sintetica con elevate proprietà meccaniche e buona resistenza agli agenti chimici. Tutta la produzione in Nylon é ottenuta mediante stampaggio per iniezione.

ACCIAIO

L'acciaio é una lega di ferro contenente carbonio fino a circa il 2% ed altri elementi che conferiscono al metallo determinate caratteristiche. In base al loro impiego gli acciai vengono comunemente divisi in acciai di uso generale e acciai speciali. Gli acciai inossidabili (inox) appartengono a questa seconda categoria ed hanno resistenza all'ossidazione ed alla corrosione, caratteristiche determinate dalla presenza in lega di nichel e cromo.

Ghidini Group can surely boast the largest catalogue of products, materials and finishes available on the handles and coordinates market.

BRASS

Brass is an industrial alloy of copper and zinc, of which zinc makes up at least 50%. The first use of copper and its alloys dates back to 5000 years ago. In our case the alloy represents a consistent part of our production and in our factories it is transformed from the original state to semi-finished products using processes of die casting, hot pressing, blanking and drawing, and turning according to whether the product is manufactured from ingots, cut down sizes of extruded bars, sheet or drawn bars.

ZALOR

Zalor is a registered trademark used to indicate a special alloy of zinc, aluminium and magnesium which is particularly suitable for die casting, used to produce articles which, after surface finishing operations, undergo galvanic treatments with gold, nickel, rhodium and chrome as well as our exclusive GHI.CO.TEC treatment.

ALUMINIUM

Aluminium is definitely one of the most interesting non-ferrous metals due to its low specific weight and its strong resistance to corrosion. This feature is considerably increased by means of anodic oxidation and now also by using the innovative GHI.CO.TEC treatment.

NYLON

Nylon is the trade name for 6.6 polyamide, a synthetic thermoplastic resin with high mechanical properties and strong resistance to chemical agents. All nylon products are made using injection presses.

STEEL

Steel is an iron alloy containing up to 2% carbon and other elements which give the metal certain characteristics. Steels are commonly divided into steels for general use and steels for specific uses according to their final use. Stainless steels belong to the second category and resist oxidation and corrosion, a characteristic which is determined by the presence of nickel and chrome in the alloy.

GHI.CO.TEC.

Nel 1995 entra in funzione il nuovo impianto per il trattamento denominato GHI.CO.TEC., Ghidini Coating Technology, un nuovo modo di concepire protezione e colorazione di maniglie e coordinati in ottone, Zalor, alluminio.

Mediante un processo di cataforesi GHI.CO.TEC. deposita sul metallo resine che aderiscono ad esso per azione di un campo elettrico che si genera nelle vasche in cui i pezzi vengono immersi; con un successivo passaggio a forno la resina si indurisce ed il pezzo assume l'aspetto definitivo.

La resina di base è trasparente ed incolore, ma con l'aggiunta di pigmenti potrebbe assumere qualsiasi colorazione. nel nostro caso utilizziamo la protezione incolore su ottone lucidato e quella "gialla" su Zalor ed alluminio.

Per l'ottone, GHI.CO.TEC., è dunque un'alternativa alla tradizionale verniciatura trasparente. Mentre per Zalor ed alluminio in un unico passaggio, il pezzo si colora, assumendo il tono dell'ottone, e si protegge dall'ossidazione e dall'usura con un deposito diretto sul metallo di base.

Il rivestimento ha uno spessore assolutamente uniforme e garantisce caratteristiche di resistenza ad usura e ossidazione superiori a quanto ottenibile con i trattamenti tradizionali.

Da non trascurare l'aspetto ecologico del processo che lavora completamente a ciclo chiuso, quindi senza scarichi nell'ambiente e senza sviluppo di fumi o sostanze nocive per gli operatori.

G-PLUS

Ghidini group, proseguendo la propria ricerca che tende ad offrire i migliori caratteri tecnici e formali, presenta G-PLUS: il più aggiornato sviluppo della tecnologia PVD (Physical Vapour Deposition) applicata alle maniglie ed ai coordinati. Superficie dura e compatta, grande resistenza alle abrasioni ed alle aggressioni atmosferiche ed un piacevolissimo colore vivo dell'ottone sono i caratteri che distinguono G-PLUS.

G-PLUS realizza rivestimenti ad elevate caratteristiche mediante condensazione sotto vuoto sulla base da rivestire di vapori ottenuti con fattori fisici.

GHI.CO.TEC.

In 1995 the new plant for the GHI.CO.TEC., Ghidini Coating Technology, started working.

This new plant is a new way to conceive protection and colouring of brass, Zalor or aluminium handles and co-ordinates.

By means of a cataphoresis process, GHI.CO.TEC. deposits resins on metal and they adhere to it through an electric field which is generated in the bath tank where the pieces are dipped; with a further kiln step, the resin hardens and the piece takes the definite look.

The basic resin is transparent and colourless, but adding pigments, it can acquire any sort of colour. In our case we use a colourless protection on polished brass and a "yellow" protection on Zalor or aluminium.

As far as brass is concerned, GHI.CO.TEC. is therefore a great change to the traditional transparent coating. Instead of treating Zalor and aluminium with the usual brass coating galvanized system, with a single GHI.CO.TEC. operation, it is possible to colour the article and at the same time give it the right protection from oxidation.

The coating is absolutely uniform as far as the thickness is concerned and guarantees those characteristics of hardness, adhesion, resistance to solvents and to corrosion in saline fog, with better results compared to those which could be reached by means of traditional treatments.

The ecological aspect has to be taken into account as well, being the process a closed cycle, therefore no emissions in the environment, no fumes or dangerous substances for the operators are developed.

G-PLUS

Carrying on their research in order to offer the best technical and formal features, GHIDINI group are presenting G-PLUS: the most up to date technological development: PVD (Physical Vapour Deposition) applied to handles and co-ordinates. Hard and compact surface, great abrasion proof, atmospheric aggression resistant and a very pleasant vivid brass colour are the features which distinguish G-PLUS.

G-PLUS is the result of the most innovative deposition technique PVD, by means of which it is possible to carry out coatings having high features through vacuum condensation of vapours obtained with physical factors on the surface to

G-PLUS prevede una reazione fisica tra ioni di zirconio. Sulle maniglie e sui coordinati si depositano sulla base in ottone precedentemente nichelata e cromata.

La generazione dei vapori avviene per effetto di una scarica ad arco sotto vuoto tra un catodo, ovvero la sorgente dei vapori stessi e la camera in cui avviene l'intero processo.

Le maniglie ed i coordinati trattati con G-PLUS godono di caratteristiche ampiamente superiori rispetto a quanto possibile con tutti i trattamenti tradizionali. Prendendo come termine di confronto la cromatura galvanica otteniamo:

	G-PLUS	Cromatura galvanica
Durezza in HV	2600/2800	800
Resistenza allo sfregamento	600 passate	400 passate
Resistenza alla corrosione in nebbia salina NNS UNI-ISO 9227	1200 ore	700 ore
Resistenza alla corrosione prova Cass-test CASS UNI-ISO 9227	300 ore	180 ore

G-PLUS ha superato severi test di laboratorio che ci consentono di certificare:

- Aderenza 100% secondo la normativa UNI-ISO 4524/5
- Nessuna alterazione dopo 1000 ore di prova accelerata di resistenza alla luce secondo la normativa UNI 9397
- Nessun intacco da parte di acido cloridrico, solforico, nitrico, ossalico, acetico e citrico, soda e potassa caustica, cianuri e sgrassature alcaline a caldo.

I risultati di protezione del trattamento G-PLUS permettono, anche ai clienti più esigenti, di ottenere maniglie e coordinati con una superficie di durezza paragonabile all'acciaio, resistenza agli agenti atmosferici che ne permette l'uso anche in esposizioni esterne in ambienti aggressivi, brillantezza del colore dell'ottone grazie alla protezione inalterabile nel tempo, garanzia illimitata perchè la protezione offerta supera anche i limiti di garanzia previsti per legge.

be coated. In the G-PLUS case, a physical reaction among zirconium ions (ZrN) which are deposited on the brass surface previously nickel and chromium plated is foreseen. The vapours are originated by means of vacuum discharge pressure between a cathode, that is the source of vapours and the chamber in which the entire process takes place. The handles and coordinates treated with G-PLUS have characteristics which are vastly superior compared to what obtainable by means of traditional treatments. G-PLUS underwent severe laboratory tests which allow us to certify:

G-PLUS underwent severe laboratory tests which allow us to certify:

- 100% adhesion according to UNI-ISO 4524/5 Norm.
- No alteration after a 1000 hour accelerated resistance to light test according to UNI 9397 norm.
- No indentation was caused by using hydrochloric, sulphuric, nitric, oxalic, acetic and citric acids, caustic soda and potassium hydroxide, cyanide and alkaline and hot degreasing.

The protective results of G-PLUS treatment allow, even to the most demanding customers, to obtain handles and coordinates with a hardened surface which can be compared to steel, which is resistant to external atmospheric agents and which can be placed externally even in saline fog. Thanks to the inalterability of protection, the brass colour brightness doesn't change and an unlimited guarantee due to protection which goes even beyond the limit guarantee foreseen by the law. G-PLUS a protection unlimited guaranteed for people who want beautiful long lasting handles.

1.3 PROVE E CERTIFICAZIONI TESTS AND CERTIFICATIONS

La norma EN 1906 definisce i requisiti e i metodi di prova per maniglie e pomoli per porte. Vengono definiti i parametri che definiscono le prestazioni. La tabella di classificazione è una stringa alfanumerica composta da 8 caratteri.

The EN 1906 standard defines requirements and test methods for door handles and knobs. The parameters defining the performance are specified below. The classification table is an alphanumeric string made up of 8 characters.

1	2	3	4	5	6	7	8
Categoria d'utilizzo Category of use	Durabilità Durability	Massa della porta Door mass	Resistenza al fuoco Fire resistance	Sicurezza (personale) Personal safety	Resistenza alla corrosione Corrosion resistance	Sicurezza contro effrazione Security (in terms of burglary resistance)	Tipo di azionamento Type of operation

1 (prima casella) Categoria d'utilizzo: Le guarniture sono suddivise in 4 categorie d'utilizzo (da 1 a 4), assegnate in riferimento alla frequenza d'utilizzo e al relativo campo applicativo.

1 (first digit) Category of use: Handle sets are classified into 4 categories of use (ranging from 1 to 4), depending on frequency and expected area of use.

1- Utilizzo di media frequenza delle guarniture, da parte di persone che sostanzialmente esercitano un utilizzo accurato e presentano un rischio ridotto per quanto riguarda l'uso non corretto (ad esempio per le porte interne di abitazioni).

1- Medium frequency of use of handle sets, by people with a high incentive to exercise care and with a small chance of misuse (e.g. internal residential doors).

Momento di torsione Rotation torque strength	Trazione Axial strength test	Gioco assiale in posizione di non utilizzo Free play *at rest*	Gioco perpendicolare sulla maniglia Free angular movement
* 20 Nm	300 N	< 10 mm	< 10 mm

2- Utilizzo di media frequenza delle guarniture, da parte di persone che esercitano un utilizzo sostanzialmente accurato ma che presentano un certo rischio per quanto riguarda l'uso non corretto. (ad esempio per le porte interne di uffici).

2- Medium frequency of use of handle sets, by people with some incentive to exercise care but where there is some chance of misuse. (e.g. internal office doors).

Momento di torsione Rotation torque strength	Trazione Axial strength test	Gioco assiale in posizione di non utilizzo Free play *at rest*	Gioco perpendicolare sulla maniglia Free angular movement
* 30 Nm	500 N	< 10 mm	< 10 mm

3- Utilizzo ad elevata frequenza delle guarniture, da parte del pubblico o di altre persone, che non hanno particolare cura nell'uso e per le quali esiste un notevole rischio d'utilizzo errato. (ad esempio per le porte di edifici pubblici notevolmente frequentati).

3- High frequency of use of handle sets, by the general public or by other people with little incentive to exercise care and with a high chance of misuse. (e.g. doors of highly frequented public buildings).

Momento di torsione Rotation torque strength	Trazione Axial strength test	Gioco assiale in posizione di non utilizzo Free play *at rest*	Gioco perpendicolare sulla maniglia Free angular movement
* 40 Nm	800 N	< 6 mm	< 5 mm

4- Per impiego su porte che vengono azionate spesso e con forza (ad esempio per porte in stadi da calcio, su piattaforme petrolifere, nelle caserme, toilette pubbliche, ecc).

4- to be installed on frequently and strongly used doors (for example inside football stadium, on oil platforms, inside military bases and public toilets).

Momento di torsione Rotation torque strength	Trazione Axial strength test	Gioco assiale in posizione di non utilizzo Free play *at rest*	Gioco perpendicolare sulla maniglia Free angular movement
* 60 Nm	1000 N	< 6 mm	< 5 mm

2- (seconda casella) Durabilità: viene inserita la classificazione 6 o 7, 6 = 100.000 cicli di prova, 7 = 200.000 cicli di prova

2 (second digit) Durability: the classification figure is either 6 or 7, 6 = 100,000 test cycles, 7 = 200,000 test cycles

3- (terza casella) Massa della porta: Non è utilizzata.

3 (third digit) Door Mass: not applicable.

4- (quarta casella) Resistenza al fuoco: 0, A, B o C
0 = non adatta per porte tagliafuoco ed antifumo
A = adatta per porte antifumo
B = adatta per porte tagliafuoco ed antifumo
C = adatto per porte tagliafuoco e antifumo, obbligo di un'anima in acciaio nella maniglia

*4 (fourth digit) Fire Resistance: 0, A, B or C
0 = not approved for use on fire/smoke doors
A = suitable for use on smoke doors
B = suitable for use on fire/smoke doors
C = suitable for use on fire/smoke doors, steel core in the handle is required*

5- (quinta casella) Sicurezza personale: 0 o 1.
(opzionale per cui in questa casella è possibile anche inserire uno 0)
0 = per uso normale
1 = per uso con requisiti di sicurezza.
(Secondo DIN 18255, tutte le guarniture per gli edifici pubblici devono superare questa prova corrispondente alle categorie 3 e 4)

*5 (fifth digit) Personal Safety: 0 or 1.
(as this is optional, the figure 0 may appear)
0 = normal use
1 = to be used in safety applications.
(According to DIN 18255, all handle sets for public buildings - i.e. items included in categories 3 and 4 - must pass this test)*

6- (sesta casella) Resistenza alla corrosione: da 0 a 5.
0 = nessuna resistenza alla corrosione
1 = resistenza ridotta alla corrosione (test nebbia salina 24 h)
2 = resistenza media alla corrosione (test nebbia salina 48 h)
3 = resistenza alta alla corrosione (test nebbia salina 96 h)
4 = resistenza molto alta alla corrosione (test nebbia salina 240 h)
5 = resistenza estremamente alta alla corrosione (test nebbia salina 480 h)

*6 (sixth digit) Corrosion Resistance: ranging between 0 and 5.
0 = no corrosion resistance
1 = mild corrosion resistance (24-hr salt-spray test)
2 = moderate corrosion resistance (48-hr salt-spray test)
3 = high corrosion resistance (96-hr salt-spray test)
4 = very high corrosion resistance (240-hr salt-spray test)
5 = extremely high corrosion resistance (480-hr salt-spray test)*

7- (settima casella) Sicurezza contro l'effrazione: da 0 a 4.
0 = nessuna resistenza allo scasso
1 = ridotta resistenza allo scasso
2 = media resistenza allo scasso
3 = notevole resistenza allo scasso
4 = resistenza estremamente alta allo scasso

*7 (seventh digit) Security (in terms of burglary resistance): ranging between 0 and 4.
0 = not approved for use on burglary resistant doors
1 = mild burglary resistance
2 = moderate burglary resistance
3 = high burglary resistance
4 = very high burglary resistance*

8- (ottava casella) Tipo di azionamento: A, B o U.
A = guarnitura con molla
B = guarnitura con precarico a molla
U = guarnitura senza molla

*8 (eighth digit) Type of operation: A, B or U.
A = spring assisted handle set
B = spring loaded handle set
U = unsprung handle set*

ESEMPIO : guarnitura in alluminio con finitura GHI.CO.TEC, assistita da molla.

EXAMPLE: spring assisted aluminum handle set with GHI.CO.TEC. coating.

PROVE E CERTIFICAZIONI IN RIFERIMENTO ALLA NORMATIVA GENERALE UNI EN 1906

RESISTENZA ALLA CORROSIONE

UNI EN 1670 Resistenza alla corrosione: la norma specifica i requisiti di resistenza alla corrosione degli accessori per porte, finestre, chiusure oscuranti e facciate continue. Si applica anche agli elementi di collegamento metallico richiesti per il fissaggio degli accessori per serramenti. Eseguiamo prove certificate da ente esterno e prove interne con una moderna camera in nebbia salina.

I nostri prodotti sono testati e classificati in riferimento alle normative:

- UNI EN ISO 1670
- UNI EN ISO 9227

TESTING AND CERTIFICATION WITH REFERENCE TO THE GENERAL RULE UNI EN 1906

CORROSION RESISTANCE

UNI EN 1670 Resistance to corrosion: the standard specifies requirements for corrosion resistance of accessories for doors, windows, shutters and curtain walls.

It also applies to metal fasteners required for attachment of accessories for doors.

We perform tests certified by an external organization and we perform also in house tests by a 'salt spray chamber' machinery.

Our products are tested and classified with reference to the following standard:

- UNI EN ISO 1670
- UNI EN ISO 9227

DURABILITÀ

UNI EN 1906 - Durabilità : i nostri prodotti vengono sottoposti a prove di durabilità con test e attrezzature interne, e i risultati (> 280.000 cicli) superano di gran lunga le richieste della normativa:

- Frequenza d'uso media: 100 000 cicli.
- Frequenza d'uso elevata: 200 000 cicli.

DURABILITY

UNI EN 1906 Durability: our products are tested for durability with internal test and equipment, and the results (>280.000 cycles) exceed the requirements of the legislation.

- Average frequency of use: 100.000 cycles
- High frequency of use: 200.000 cycles

RESISTENZA AL FUOCO

UNI EN 1634 - Resistenza al fuoco: i prodotti da utilizzare su porte tagliafuoco / antifumo devono essere conformi ai requisiti appropriati della UNI EN 1906 e ai requisiti supplementari della norma UNI EN 1634.

FIRE RESISTANCE

Uni EN 1634 - Fire resistance : products for use on fire/smoke door must comply with requirements of EN 1906 and to the additional requirements of UNI EN 1634.

1.4 AVVERTENZE WARNINGS

PRECAUZIONI PER INSTALLATORI ED UTILIZZATORI FINALI PRECAUTIONS FOR INSTALLATION AND CONSUMERS

Protezione dall'acido tannico: nelle finestre e porte-finestre in legno di rovere o altre essenza con un elevato contenuto di tannino, assicurarsi che questo non possa evaporare dal legno. La guarnitura non deve avere contatto diretto con una superficie del legno non trattato.

Tannic acid protection: in the windows and glass doors in oak or other trees with a high tannin content, make sure that this can not evaporate from the wood.

The crank should not have direct contact with a surface of untreated wood.

Protezione da sigillante: non utilizzare mai sigillanti a reticolazione acetica o contenenti altre sostanze aggressive, ad esempio acido formico o acetico, composti di ammoniacale, aldeide, fenoli, cloro, tannino ecc., perché sia il contatto diretto con il sigillante che i vapori di queste sostanze possono aggredire la superficie dei particolari.

Sealant protection: Do not use any sealant acetic or other aggressive substances such as formic acid, acetic acid, ammonia compounds, aldehyde, phenol, chlorine, tannin etc., for a direct contact with the sealant, the vapors of these substances can damage the finishings of the products.

Durante i lavori in genere, demolizione, ristrutturazione, realizzazione di intonaci e tinteggiatura, riparare le guarniture (comunque tutti i nostri prodotti) dal contatto con polveri, calce, intonaco, tempere e smalti vari.

During general maintenance, demolition, renovation, plastering and painting, repairing the cranks (though all of our products) from contact with dust, lime, plaster, tempera and various glazes.

Fare aerare bene il locale prima di togliere le protezioni, il consiglio se possibile sarebbe di montare le guarniture dopo aver eseguito i lavori e dopo essersi assicurati che il locale sia stato ben aerato.

Make sure the rooms are ventilated enough before removing the protections.

The best advice if possible is to mount the cranks after performing other works and after making sure that the premises was well aerated.

Pulizia e protezione da detersivi aggressivi contenenti acidi: pulire le guarniture esclusivamente con panno morbido e detersivi a pH neutro diluito. Non usare mai detersivi o abrasivi aggressivi contenenti acidi. Questi potrebbero danneggiare le guarniture.

Cleaning and protection from detergents containing acids: clean the cranks only with soft cloth and neutral pH detergent diluted. Never use harsh or abrasive cleaners containing acids. These could damage the crank.

La non osservanza delle suddette indicazioni può causare danni irreparabili al prodotto.

The non-observance of these instructions may cause irreparable damage to the product.

DK-1P

- Gioco in plastica senza bussole/bussole D.9,5/bussole D.11,5
- Rosetta ovale/rettangolare
- Maniglia fissata con grano
- Possibilità di avere 8 scatti
- Sporgenza ferro Q.7 standard: mm 40
- Sporgenze ferro Q.7 a richiesta: mm 30/33/35/45/50

- Plastic mechanisme without pins/with pins D.9,5/with pins D11,5
- Oval rose/rectangular rose
- Lever handle fixed by grub screw
- Availability of 8 positions (45°)
- Standard projection of spindle: 7x40 mm
- On request projection of the spindle: 7x30/33/35/45/50 mm

DK-2P

- Gioco in plastica senza bussole/bussole D.9,5/bussole D.11,5
- Rosetta ovale/rettangolare
- Maniglia solidale senza grano
- Possibilità di avere 8 scatti
- Sporgenza ferro Q.7 standard: mm 40-35
- Sporgenze ferro Q.7 a richiesta: mm 45-40/35-30

- Plastic mechanisme without pins/with pins D.9,5/with pins D11,5
- Oval rose/rectangular rose
- Lever handle fixed
- Availability of 8 positions (45°)
- Standard projection of spindle: 7x40-35 mm
- On request projection of spindle: 7x45-40/35-30 mm

DK-1F

- Gioco in ferro con bussole D.9,5
- Rosetta ovale/rettangolare
- Maniglia fissata con grano
- Disponibile solo con 4 scatti
- Sporgenza ferro Q.7 standard: mm 35
- Sporgenze ferro Q.7 a richiesta: mm 30/40

- Iron mechanisme with pins D.9,5 mm
- Oval rose/rectangular rose
- Lever handle fixed by grub screw
- Available only with 4 positions (90°)
- Standard projection of spindle: 7x35 mm
- On request projection of spindle: 7x30-40mm

DK-2F

- Gioco in ferro con bussole D.9,5
- Rosetta ovale/rettangolare
- Maniglia solidale senza grano
- Possibilità di avere 8 scatti
- Sporgenza ferro Q.7 standard: mm 40-28

- Iron mechanisme with pins D.9,5 mm
- Oval rose/rectangular rose
- Fixed handle without grub screw
- Availability of 8 positions (45°)
- Standard projection of spindle: 7x40-28 mm

DK-3P

- Gioco in plastica senza bussole/bussole D.9,5/bussole D.11,5 a vista sui lati
- Rosetta rettangolare rotante
- Maniglia solidale senza grano
- Possibilità di avere 8 scatti
- Sporgenza ferro Q.7 standard: mm 40
- Sporgenze ferro Q.7 a richiesta mm 30/33/35/45

- Plastic mechanism without pins/with pins D.9,5/with pins D11,5
- Rotating rectangular rose
- Lever handle fixed without grub screw
- Availability of 8 positions (45°)
- Standard projection of spindle: 7x40 mm
- On request projection of spindle: 7x30/33/35/45 mm

DK-4P

- Gioco in plastica senza bussole/bussole D.9,5/bussole D.11,5 a vista sui lati
- Rosetta ovale rotante
- Maniglia solidale senza grano
- Disponibile solo con 4 scatti
- Sporgenza ferro Q.7 standard: mm 40
- Sporgenze ferro Q.7 a richiesta mm 30/35/45

- Safety system with pins D.9,5 mm in addition to DK-2P without pins
- Oval rose
- Fixed handle without grub screw
- Available only with 4 positions (90°)
- Standard projection of spindle: 7x40 mm
- On request projection of spindle: 7x30/35/45 mm

DK-SIC/F

- Sistema di sicurezza con bussole D.9,5 abbinato a DK-1F con bussole D.9,5
- Rosetta ovale
- Maniglia fissata con seeger
- Disponibile solo con 4 scatti
- Sporgenza ferro Q.7 standard: mm 40
- Sporgenze ferro Q.7 a richiesta: mm 30/35/45

- Safety system with pins D.9,5 mm in addition to DK-1F with pins
- Oval rose
- Fixed handle by seeger
- Available only with 4 positions (90°)
- Standard projection of spindle: 7x40 mm
- On request projection of spindle: 7x30/35/45 mm

SISTEMA RG/RG SYSTEM

- Sistema di sicurezza per DK con chiusura a cilindro
- Movimento con bussole D.9,5 in lega di zinco pressofusa grezza
- Cilindro e chiave in lega di zinco pressofusa e nichelata
- Copertura in ottone varie finiture
- Maniglia fissata con grano
- Disponibile solo con 4 scatti
- Sporgenze ferro Q.7 disponibili: mm 31/35/42

- Safety system for DK with cylinder
- Zinc - alloy die casted mechanism with pins D.9,5
- Cylinder and key, nickel-plated
- Brass cover in different finishing
- Lever handle fixed by grub screw
- Available only with 4 positions (90°)
- On request projection of spindle: 7x31/35/42 mm

CONDIZIONI GENERALI DI VENDITA

PREZZI:

Il prezzo di listino è riferito a N°1 pezzo dell'articolo con codice ad esso riferito IVA esclusa con resa franco partenza e imballo quantificato nella misura del 1% dell'imponibile in fattura.

SPEDIZIONI:

La merce viaggia in ogni caso a rischio e pericolo del committente. In assenza di precise istruzioni circa il mezzo di inoltro della merce le spedizioni sono eseguite nel modo ritenuto più idoneo ed economico senza nessuna responsabilità della Casa.

PAGAMENTI:

Devono essere effettuati direttamente al domicilio della nostra sede o mediante estinzione di nostre ricevute bancarie entro la scadenza concordata. Eventuali ritardi comportano il conteggio degli interessi di mora.

ORDINI:

Tutti gli ordini devono essere inoltrati ai nostri agenti di zona utilizzando codici e descrizioni corrette di quanto richiesto. Eventuali ordini inviati direttamente alla nostra sede sono accettati solo se trasmessi a mezzo telefax e completi di codici e descrizioni corretti di quanto richiesto. Ogni articolo richiesto in quantità inferiore al numero di pezzi previsti nella confezione standard subirà un aumento prezzo del 10%. Tutti gli ordini, in ogni caso, sono subordinati all'approvazione della Casa.

FATTURAZIONE:

Il minimo importo netto merce fatturabile è di € 200,00.

TERMINI DI CONSEGNA:

Il termine di consegna e di spedizione, anche se confermato, costituisce una semplice previsione ed ha perciò un valore indicativo, quindi non comporta nessuna garanzia e nessun indennizzo è dovuto per la mancata consegna nel termine previsto.

ARTICOLI:

Tutti gli articoli presentati con il precedente Listino Illustrato 2012, ma non citati in questa edizione sono usciti di produzione, pertanto eventuali ordini in corso saranno evasi fino ad esaurimento delle scorte. Ogni variante rispetto agli articoli a listino è da considerarsi prodotto speciale per il quale, di volta in volta, è necessario richiedere fattibilità, quantità minima, prezzo. La fornitura di prodotti speciali a richiesta è subordinata all'accettazione da parte del committente della relativa conferma d'ordine. La Casa si riserva il diritto di approvare modifiche agli articoli e variazione dei prezzi senza preavviso.

RESI:

Non si accettano resi di merce standard, se non espressamente autorizzati dalla Casa. Le contestazioni, comunque, devono essere fatte entro 8 giorni dal ricevimento della merce. Le richieste di reso devono pervenire a mezzo fax, verranno analizzate ed eventualmente autorizzate mediante apposita "Scheda di Autorizzazione Reso" indicante tutte le modalità e condizioni alle quali verrà accettato il reso. Qualsiasi reso pervenuto senza preavviso ed autorizzazione verrà respinto al mittente. Per prodotti speciali approntati a richiesta non si accettano resi per alcun motivo. Per qualsiasi controversia è competente il Foro di Brescia.

GENERAL TERMS AND CONDITIONS OF SALES

ORDERS:

All direct and indirect Orders are subject to our approval and cannot be revoked by the Buyer.

DELIVERIES:

The delivery terms are approximate. In case of delays in the execution of an Order or partial shipments, the Seller will not be liable for damages.

SHIPMENTS:

Even if the goods are supplied free destination, they are forwarded at the exclusive risk of the Buyer who is obliged to collect them. In case of non-collection the damages ensuing from this will be entirely at the Buyer's expense.

CLAIMS:

No claims can be considered unless made within seven days of delivery of the goods. In case of a recognized imperfection of the product, it will be replaced, on the understanding that it has not been put into use.

PAYMENTS:

All payments must be made within the terms agreed upon and exclusively to our domicile. In case of delays the Seller will be entitled to a Credit Surcharge of three percent above the official interest rate. Discounts or deductions are not accepted, unless previously authorized.

JURISDICTION:

For any controversy the only competent instance is the Court of Justice of Brescia.
